

2020 Buyer's Guide

ADIPOSE

Ron Kammerer

info@carestreamamerica.com

855-892-3872 | www.carestreamamerica.com | **PC: Boston BioLife**

CAREstream America is the premier distributor of premium regenerative and pain management solutions that include APIC-A2M™ with FAC Testing, Amniosomes, PRFM, 100% Pure Amniotic Fluid, Non-Centrifuge Bone Marrow Aspirate and Micronized Fat with body-jet®. If you're looking for comprehensive regenerative program development support, connect to learn about joining our affiliate network, **Axiom Therapies**. We also carry Pro-Nox, human med®, Chemometec®, Christie Medical VeinViewer® Flex/Vision2, and TULIP® products to help shape and image the body, count stem cells, showcase the veins and relieve the pain and anxiety of procedures. With our Gentec® and Westmed® lines we offer a variety of medical products for patient care from suction products, adaptors, flowmeters & regulators to anesthesia, respiratory and critical care.

Greg Miles

greg@mmt-us.com

949-215-8560 | www.cellmyx.com | **PC: Boston BioLife**

Cellmyx is a medical device manufacturer committed to advancing the art of aesthetic and regenerative injectables. We design, patent, and manufacture proprietary medical products for the harvesting, processing, and deployment of FDA 361 compliant (minimally manipulated) autologous soft tissue. Our leading product line, intelliFat™, is a single use kit that enables physicians to quickly and efficiently transfer the patient's own adipose tissue under local anesthesia for aesthetic and regenerative procedures. A new version of the kit, intelliFat™ SVT, focuses on the regenerative side of adipose transfer allowing a physician to harvest and process highly viable micro-fragmented adipose (what we term as stromal vascular tissue, SVT) in a safe, quick, reproducible, and cost effective manner. **Learn more: www.intellifat.com**

ALLOGENEIC TECHNOLOGIES

Dakota Broughton

dakota@regenmedsupply.com

509-570-6208 | www.regenmedsupply.com | **PC: Boston BioLife**

Regenmed Supply is a national distributor of an Amniotic Tissue Allograft which is reimbursed by Most Insurances with its own unique Q code.

BONE MARROW ASPIRATE

Troy Openshaw

troy@apexbiologix.com

801-870-7414 | www.apexbiologix.com | **PC: Boston BioLife**

APEX Biologix's concentration system offers the best processing technique to maximize patient outcomes. Our system creates a highly concentrated injectate of platelets, stem cells, and growth factors depending on the procedure being performed.

John McCloskey

johnm@leadingresponse.com

813-885-8270 | www.leadingresponse.com | **PC: Boston BioLife**

LeadingResponse, a client acquisition specialist with 36 years of experience delivering data-driven solutions to professional services end markets. We are a prospecting engine capable of generating consistently high-quality leads to help grow your business.

Garrett Ewers

garrett@rejuvmedical.com

320-492-9085 | www.rejuvmedical.com | **PC: Boston BioLife**

Through our **Five Pillars of Practice Success** we Support Physicians and Medical Professionals in Building A Proven New Model of Healthcare that is Outcome-Driven, Affordable, Sustainable, Profitable and Desperately Needed to Help Patients Restore and Regenerate Health. Our system also focuses on high-end regenerative hands-on injection training.

CELL SIGNALING / EXTRACELLULAR VESICLES

John Siegel

john@integrativepeptides.com

443-732-5272 | **PC: Boston BioLife**

Integrative Peptides was born out of the idea that there had to be a better way for patients and their healthcare providers to gain access to safe peptide supplements. Physicians interested in peptides are currently limited to high priced options or risky, unvetted overseas or research only suppliers. Enter Integrative Peptides, founded in 2018 with one purpose: to offer over a peptide supplement that meets the highest standards of quality, safety, and value. **For Faster Service text us at 443.REAL.BPC**

Tamara Apted

tamara@juvexo.com

858-692-0269 | www.juvexo.com | **PC: Boston BioLife**

JuveXO is an exosome product containing high quality cellular ingredients from human umbilical cord lining stem cells (ULSCs). Cells derived from ULSCs have plasticity characteristics of mesenchymal stem cells. ULSCs can be broken down into the desired ingredients for cosmetic use, via culture with appropriate induction and growth media.

Brett Gibbs

brett@kimeralabs.com

954-551-0049 | www.kimeralabs.com | **PC: Boston BioLife**

Kimera Labs: cGMP biotechnology laboratory specializing in the production of isolated perinatal mesenchymal stem cell- derived exosome products for scientific and clinical research.

CELL SIGNALING / EXTRACELLULAR VESICLES (CONT.)

NEOBIOSIS
Regenerative Science.

Tamara Bonacorsi
tamara@neobiosis.com
646-402-1227 | **PC: Boston BioLife**

A **cGMP** Contract Development and Manufacturing Organization. Amniotic Fluid-derived extracellular vesicles (**Cytosomes™**) for research and clinical trials.

GENETIC TESTING

MaxGen
LABS

Chad Yarbrough
chad@maxgenlabs.com
832-879-2799 | www.MaxGenLabs.com | **PC: Boston BioLife**

MaxGen Labs is a private genetic testing company focused on optimizing nutritional outcomes for your patients. A quick, non-invasive cheek swab can give you valuable information to create personalized care plans, complete with vitamin and IV protocols. Ideal for regenerative and integrated medicine practices, genetic testing can provide information about detoxification pathways, hormone and neurotransmitter activity, and inflammatory conditions. The clinician-driven genetic reports from MaxGen Labs have been called “the missing piece of regenerative medicine” by multiple doctors. MaxGen Labs helps you take the guesswork out of patient care and increases compliance. **Sign up for a healthcare practitioner account today to get started.**

HAIR RESTORATION

Cellustrious®
LET HAIR THRIVE

Misti Barnes
info@cellustrious.com
213-536-9339 | www.Cellustrious.com | **PC: Boston BioLife**

Cellustrious® Hair Rejuvenation is a patent-pending, in-office treatment and home maintenance plan, that combines microneedling with a proprietary serum that includes 5 of the most powerful, plant-derived peptides, including Procapil® and Anagain®.

HEALTH & WELLNESS

INTEGRATIVE PEPTIDES

John Siegel

HEALTH & WELLNESS (CONT.)

Microvascular Health Solutions

Support@Microvascular.com

800-227-1933 | **PC: Boston BioLife**

New medical science reveals the importance of the endothelial glycocalyx, a transparent, micro thin, gel-like layer lining the capillaries and vital organs. After years of study using GlycoCheck, a medical testing device from **Microvascular Health Solutions**, researchers know the glycocalyx breaks down because aging, poor diet, lack of exercise, genetics, stress, and smoking. The glycocalyx is vital to health because it enables nutrient, hormone, and oxygen delivery, and waste and carbon dioxide removal, from vital organs. Researchers in more than 85 hospitals and universities worldwide are documenting in studies how a weakened glycocalyx begins a spiral of organ starvation, and is linked to these diseases and conditions: Hypertension, Heart Disease, Kidney Disease, Stroke, Dementia, Septic Shock, Inflammatory Disorders, Compromised Immunity, and Cancer Metastasis. For people with a damaged microvascular system, it's possible to restore, regenerate, and protect the endothelial glycocalyx with Endocalyx, a product available only from My Body Rx and Microvascular Health Solutions.

Frank Menzler

frank.menzler@movendo.technology

857-272-6090 | www.movendo.technology | **PC: Boston BioLife**

Movendo Technology was established as a spin-off of the world renowned Istituto Italiano di Tecnologia (IIT) in 2017. Headquartered in Genoa, Italy with subsidiaries in Boston, MA and Munich, Germany, Movendo develops, manufactures and markets the robotic hunova® system to a wide range of global health care facilities and private practitioners. The hunova is a programmable robotic medical device for both objective, functional evaluation and physical therapy. The device consists of two independent electromechanical movable platforms, one at foot level and one at seat level. The device can operate in active, passive, and assistive mode and includes over 200 exercises, macroareas and protocols.

IMAGING

Rudy Garay, President

rudy@rgshealthcare.com

407-449-8283 | www.rgshealthcare.com | **PC: Boston BioLife**

National distributor of ultrasound, C-Arm and Kyphoplasty Kits. Our access to multiple manufacturers allows us the freedom to recommend the perfect solution to our clients that fits both their clinical and budgetary needs/requirements.

Ask me about our, \$99/month Practice Builder Program.

Would you like to be listed in our Buyer's Guide? Call (978) 569-8080 for more information.

LASERS

Doug Mercer
dm@dallasregenerativellc.com
310-869-9247 | www.dallasregenerativellc.com | **PC: Boston BioLife**

Dallas Regenerative Solutions, a Texas-based, licensed device distributor carrying a complete portfolio of regenerative technologies (ECSW, HPLT, 1470nm Diode Non-Ablative Laser, Fractional Dermal Infusion, etc.) and biologics (Placental-derived MSC Exosomes and MSCs, Amnion/ECM, Purified Amniotic Fluid, etc.), seeks to be a true resource in the rapidly expanding field of Regenerative Medicine by providing practitioners more than just a product with an instruction booklet. DRS truly specializes in helping practitioners implement these devices and biologics into their menu of services by providing a thorough technological understanding of the item and where it fits in with regenerative medicine as a whole, hands-on training, protocol books, consent forms and treatment logs, and marketing programs necessary to drive traffic to their practice.

PAIN MANAGEMENT / ANALGESIC

Ron Kammerer
info@carestreamamerica.com
855-892-3872 | www.carestreamamerica.com | **PC: Boston BioLife**

CAREstream America is the premier distributor of premium regenerative and pain management solutions that include APIC-A2M™ with FAC Testing, Amniosomes, PRFM, 100% Pure Amniotic Fluid, Non-Centrifuge Bone Marrow Aspirate and Micronized Fat with body-jet®. Regenerative medicine practitioners are currently without the important and necessary protection now afforded within our program. *Please contact us for coverage details and a quote.*

PRP

Troy Openshaw
troy@apexbiologix.com
801-870-7414 | www.apexbiologix.com | **PC: Boston BioLife**

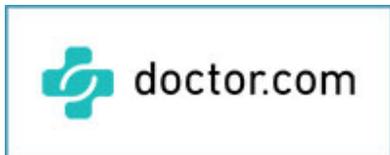

APEX Biologix's concentration system offers the best processing technique to maximize patient outcomes. Our system creates a highly concentrated injectate of platelets, stem cells, and growth factors depending on the procedure being performed.

Russ Riggs, MD
russ@tropocells.com
877-727-9727 | www.tropocells.com | **PC: Boston BioLife**

Tropocells® Advanced Gel Separation Technology Produces The Optimal PRP Formula. Before now Platelet Rich Plasma (PRP) systems were unable to sustain the mononuclear cell population while eliminating the RBC and neutrophils. However, the advanced gel separator utilized by Tropocells® removes the cells that promote inflammation and catabolism while producing a solution rich in platelets and monocytes. This optimizes healing and growth.

REPUTATION & ONLINE RATING MANAGEMENT

Joanna Kostopoulos Senior Regenerative Medicine Practice Consultant
joannak@corp.doctor.com
646-736-6532 | www.doctor.com | **PC: Boston BioLife**

Doctor.com empowers leading physicians to showcase their unique expertise across the web. Having worked with hundreds of physicians in the Boston BioLife community, we have developed a winning playbook to help you build your personal brand, differentiate from competitors, and attract high-value new cases through digital channels you are not using today. Unlike the many point solutions in the marketplace, Doctor.com offers a complete platform that's been purpose-built for practices like yours.
